

# SIVASAKTHI PARAMASIVAM

## Full Stack Developer

Email: sivasakthi.dev2025@gmail.com | Phone: +91 9025318113 | Location: Chennai

LinkedIn: <https://www.linkedin.com/in/sivasakthi-dev>

---

## PROFESSIONAL SUMMARY

Developed web and desktop applications using React.js, Node.js, and MySQL for over 3 years. Improved system reliability by 60% through robust error handling and monitoring. Reduced deployment time with CI/CD pipelines and automated testing. Built scalable REST APIs that support a modular architecture for cross-team development.

---

## TECHNICAL SKILLS

**Frontend** : React.js, Material UI (React MUI), Redux, Electron.js, JavaScript, TypeScript, HTML, CSS

**Backend** : Node.js, Express.js, RESTful APIs, WebSocket, JSON Web Token (JWT)

**Database** : MySQL, MongoDB

**DevOps & Cloud** : AWS (EC2, S3, Lambda), Docker, Jenkins, Nginx, Git, GitHub

**Testing & Debugging** : Postman, Chrome DevTools, Unit Testing, SonarQube

**Workflow** : Agile

---

## WORK EXPERIENCE

**Full Stack Engineer | VisAI Labs Private Limited | Chennai, India | April 2022 - Present**

- Cut UI rework by 50%, saving over 30 development hours per month and increasing task completion rates by 25% for 100+ users.
- Built 4 Node.js microservices, reducing CPU load by 40% and handling 10,000+ daily requests with 99.9% uptime.
- Standardized HID scanner setup, removing 10+ manual steps and reducing deployment time by 75% across 30+ devices.
- Optimized 20+ MySQL queries, increasing throughput by 40% and reducing report generation time from 3 minutes to 1 minute.
- Delivered 10+ features on schedule 95% of the time, boosting release frequency by 30% and customer engagement by 20%.
- Improved logging, retry logic, and error handling, cutting incident rate by 60% and achieving 99.95% reliability SLA.
- Designed smart trigger to cut processing time by 50%, speeding up 1,000+ daily parcel measurements across 3 warehouses.
- Led code reviews and managed Git workflows, maintaining 95% merge accuracy and reducing post-deployment bugs by 40% across 3 teams.
- Integrated SonarQube checks into CI pipelines, reducing critical bugs by 90% and improving code quality across 5 projects.
- Updated API documentation with ReDoc, reducing integration time by 60% and helping 3 external clients in under 2 days.

---

## PROJECTS

### **vMeasure Parcel Dimensioning System:**

**Technology Used:** React.js, Electron.js, Node.js, MySQL

- Connected hardware devices with the desktop application for seamless data exchange.
- Built features into the desktop app to handle additional operations.
- Found and applied solutions to improve task performance.
- Created APIs to support new application functions.
- Built and tested new features to match project needs.
- Wrote clear API documentation for developers and end-users.

---

### **vMeasure Pallet Dimensioning System:**

**Technology Used:** React.js, Electron.js, Node.js, MySQL

- Linked hardware devices with the desktop app to enable direct interaction.
- Added features to the app for handling specific hardware-related tasks.
- Improved task efficiency by addressing bottlenecks in the workflow.
- Built APIs to support new hardware-driven operations.

---

## EDUCATION

**Bachelor of Engineering in Electronics and Communication Engineering**

**JP College of Engineering, Tenkasi, Tamil Nadu**

**August 2018 – August 2022**

---

## SOFT SKILLS

- Team player.
  - Solution-Finding.
  - Task Prioritization.
  - Issue Management.
  - Flexibility.
-
