SUMMARY

Full Stack Developer with 3 years 11 months of experience developing web applications using **React.js, Node.js, Express.js, JavaScript, REST APIs, MySQL, MongoDB, and AWS**. Experienced in developing **React.js user interfaces, Node.js and Express.js APIs, database integrations, application testing, debugging, and deployment**. Hands-on experience building **LLM-powered chatbots and AI agents** using **Groq API, LangChain, and LangGraph**.

Technical SKILLS

- **Frontend** : HTML, CSS, JavaScript, React.js
 - **Backend** : Node.js, Express.js, REST APIs
 - **Database** : MongoDB, MySQL, Mongoose, Sequelize
 - **DevOps** : Docker, Jenkins, Git, AWS, GCP, Linux
 - **AI Tools** : Cursor, ChatGPT, Claude
-

EXPERIENCE

Techjays Private Limited | Software Engineer Associate

Jul 2025 - Mar 2026

- Developed **Node.js** and **Express.js backend microservices**, improving isolation across backend services and reducing deployment dependencies by **40%**.
- Built reusable **Axios service modules** for **RESTful APIs** to simplify API integration and reduce code duplication.
- Designed **Mongoose schemas and models** to support **MongoDB** data management
- Architected an **LLM-powered RAG assistant** with retrieval optimization, reducing documentation lookup time by 40% and improving developer productivity by **25%**.
- Deployed applications on **Google Cloud Platform (GCP)** using **Google Compute Engine (GCE)** for cloud-based application hosting.

VisAI Labs Private Limited | Full Stack Engineer

Jan 2024 - Jun 2025

- Built scalable and maintainable **frontend applications** using **React.js, React MUI, CSS, and JavaScript**, reducing UI duplication by **30%**.
- Designed and implemented **backend services and RESTful APIs** using **Node.js** and **Express.js** to manage business logic, data processing, and system integration.
- Engineered **CI/CD pipelines** using **Jenkins** and **Docker-based** containerization, automated **Continuous Integration and deployment workflows**, and accelerated release cycles by 60%.
- Deployed and maintained applications on **AWS**, using **Amazon EC2** for application hosting and infrastructure management.
- Mentored **junior engineers**, conducted **code reviews**, and provided technical guidance to support development activities and maintain coding standards.

VisAI Labs Private Limited | Full Stack Engineer Trainee

Jan 2023 - Dec 2023

- Developed and maintained **frontend applications** using **web technologies**, including **HTML, CSS, JavaScript, and React.js**.
- Optimized **SQL queries in MySQL** through **database indexing**, reducing query response times by **20%** under peak workloads.

- Containerized **backend applications using Docker** eliminated environment drift and decreased environment-specific defects by **50%** across deployment stages.
- Collaborated with cross-functional teams during **sprint planning** to ensure feature completion and timely releases.
- Applied **system design concepts** by developing modular **frontend components, RESTful APIs, backend services, and database integrations.**

VisAI Labs Private Limited | Project Intern

Apr 2022 - Dec 2022

- Created **Shell scripts** to automate desktop application deployments in **Linux environments**, reducing manual deployment time by **50%**.
- Performed **unit, integration, and API testing** to validate application functionality, improve reliability, and reduce production defects by **30%**.
- Managed source code using **Git** and collaborated with development teams through **version control systems.**
- Collaborated with **cross-functional teams** using **Agile methodologies** and **Git**, improving sprint delivery efficiency by **25%**.

SOFT SKILLS

- Innovation
- Ownership
- Problem solving
- Communication
- Continuous learning

PROJECTS

LLM Chatbot | React.js, Node.js, Express.js, REST API, Groq API

- Created a responsive **LLM-powered chatbot** using **React.js** for the frontend.
- Built **Node.js and Express.js REST APIs** to handle chat requests and backend processing.
- Integrated the **Groq API** to generate fast, context-aware responses from user queries.
- Implemented frontend-backend communication through **REST APIs** for seamless chat interactions.

AI Tool Assistant | React.js, Node.js, Express.js, REST API, Groq API, LangChain, LangGraph

- Engineered an **LLM-powered AI assistant** focused on **Weather, Time, and Calculation**-related queries.
- Configured a **Router LLM** to classify user queries and determine whether they should be handled by the AI assistant.
- Integrated Weather, Time, and Calculator tools using **LangChain** for processing supported requests.
- Used **LangGraph** to manage the assistant's workflow, routing, and tool execution.
- Built a responsive **React.js** frontend with **Node.js and Express.js REST APIs** for user interactions.

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering
JP College of Engineering (Aug 2018 - Aug 2022)
