

Sivasakthi Paramasivam

MERN Stack Developer

9025318113 sivasakthi.dev2025@gmail.com Chennai [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

MERN Stack Developer with 3 years 11 months of experience developing web applications using React.js, TypeScript, Node.js, and Express.js. Built RESTful APIs, integrated MySQL and MongoDB databases, engineered proof-of-concept (POC) solutions for feature validation, and deployed applications on AWS and Google Cloud platforms. Contributed to application performance optimization, system reliability, and end-to-end software development lifecycle processes.

HARD SKILLS

Frontend:

React.js, Redux, Context API, TypeScript, JavaScript (ES6+), HTML5, CSS3

Backend:

Node.js, Express.js, RESTful APIs

Databases:

MySQL, MongoDB

Cloud & DevOps:

AWS (EC2, S3), Google Cloud Platform (GCP), Docker, Jenkins, CI/CD

Tools & Technologies:

Git, Version Control

WORK EXPERIENCE

Techjays Private Limited | Software Engineer Associate

Jul 2025 - Mar 2026 | Chennai, Tamil Nadu

Techjays is a digital product engineering company focused on building scalable web applications, AI-driven solutions, and cloud-native systems for startups and enterprises.

Responsibilities

- Architected a web crawling system using **Playwright and Node.js** to detect dynamic frontend routes across authenticated and client-rendered web applications.
- Created a web performance auditing platform using Google Lighthouse and Playwright, increasing frontend load efficiency by approximately 30%.
- Designed an **LLM and RAG-based** knowledge chatbot to improve contextual retrieval and reduce documentation lookup time by ~40%.
- Built a project management system using React.js, Node.js, and MongoDB, which reduced task tracking delays by approximately 30%.
- Managed Google Cloud Platform (GCP) infrastructure for backend services to maintain high production availability and deployment reliability.

VisAI Labs Private Limited | Full Stack Engineer

Jan 2024 - Jun 2025 | Chennai, Tamil Nadu

VisAI Labs is a computer vision and AI company focused on parcel dimensioning and warehouse automation for logistics and e-commerce.

Responsibilities

- Developed full-stack applications using React.js and Node.js, reducing deployment failures by approximately 25% through a modular application structure.
- Implemented SOLID principles and MVC design patterns to improve component reusability and simplify application maintenance.
- Developed RESTful APIs using Express.js with JWT and OAuth to enable authenticated and authorized communication between backend services.
- Refactored backend service logic using Node.js and Express.js, reducing execution errors by approximately 30% and improving backend maintainability.
- Resolved critical production issues, reducing backend service downtime by approximately 25% and improving production stability.
- Led **Agile sprint** development activities, including feature implementation support, debugging, and peer code reviews.

VisAI Labs Private Limited | Full Stack Engineer Trainee

Jan 2023 - Dec 2023 | Chennai, Tamil Nadu

Responsibilities

- Engineered Redux and Context API for state management, enhancing UI rendering efficiency and application stability.
- Configured Express.js middleware for authentication and request validation to improve backend request security and API reliability.
- Improved MySQL query response time through database indexing and schema refinement, thereby increasing data retrieval efficiency.
- Maintained AWS infrastructure (EC2, S3), improving deployment reliability and supporting scalable application hosting for production environments.
- Contributed to **system design discussions and technical planning** for scalable web application architecture and deployment strategy.

VisAI Labs Private Limited | Project Intern

Apr 2022 - Dec 2022 | Chennai, Tamil Nadu

Responsibilities

- Automated desktop application deployment workflows using **shell scripting**, reducing manual deployment effort by **~60%**.
- Implemented SonarQube static code analysis to detect maintainability issues and reduce code quality risks.
- Built reusable React.js UI components using Redux, HTML5, CSS3, and JavaScript, which increased frontend development efficiency by approximately 30%.
- Configured frontend and backend communication using Axios with REST APIs, improving inter-module data exchange efficiency by approximately 25%.

- Integrated centralized logging using **Winston** to enhance system observability and reduce debugging time by ~40%.
 - Participated in Agile/Scrum ceremonies, including sprint planning, stand-ups, and retrospectives to support feature delivery cycles.
-

SOFT SKILLS

- Strong problem-solving and analytical skills.
 - Experience working in cross-functional Agile teams.
 - Ability to debug and optimize complex application workflows.
 - Strong communication and stakeholder collaboration skills.
 - Fast learner with adaptability to enterprise-scale technologies and development environments.
-

CERTIFICATE

- Claude 101 – Anthropic
-

EDUCATION

Bachelor's Degree (B.E) in Electronics and Communication Engineering
JP College of Engineering (2018 - 2022)
